

Classification Test (chapter 9) Study Guide

Use the mnemonic device you created to list the eight levels of classification in the correct order. You will be given a list of these words; domain, kingdom, phylum, class, order, family, genera, species

Match a list of organisms and characteristics to the correct domain and kingdom. Use the worksheet from chapter 9.

Explain how the following concepts relate to each other: living things, domains, archaea, bacteria, eukarya, protista, fungi, plantae, animalia. Remember the concept map in your science journal.
