

EXTENSION ACTIVITIES LIFE SCIENCE

You may choose any extension activities as long as you have an A or B in science. Tests are still required. Dates and study guides for tests will be posted on my weebly web site.

Cells in Action

<p>Issac Newton said, "If I have seen further it is by standing on the shoulders of giants."</p> <p>Research early plant scientists: Jan Baptista Van Helmont, Joseph Priestley, and Jan Ingenhousz.</p> <p>How did the research they conducted impact future generations of scientists?</p>	<p>Run the Gizmo for Osmosis. Paperwork for extension activities are located at the front of the classroom. Look in the top compartment of the red paper holder.</p>
<p>Complete puzzle activities "the cell in action" and "cells, basic units of life". Paperwork for extension activities are located at the front of the classroom. Look in the top compartment of the red paper holder.</p>	<p>"Contagion" by Katherine MacLean is set somewhere other than Earth. After reading the story, write a short essay comparing and contrasting the setting in the book with life on Earth. I have copies of the short story.</p>

Any of these extension activities may be chosen instead of vocabulary assignments or textbook assignments. You may also choose to do any activity in addition to a classroom assignment. If you feel that a classroom activity is redundant with what you have already done for an extension activity, you may plead your case. Then you could pick an extension activity rather than the classroom activity.
