

CHANGE OVER TIME EXTENSIONS

Research countershading and how it works as camouflage for different animals. Create a keynote of examples as seen from above and below.	Your Choice. Check with teacher before you begin.	Read the short story, "The Anatomy Lesson". Write a short report about the ways the characters are forever changed.
Research the Leakey family business of paleoanthropology. What is it and how has it changed our world view? Or has it?	Why did the dinosaurs die out? Research various hypotheses and select the one that makes the most sense to you. Present it to the class.	Gizmo on microevolution found in purple folder in the red hanging files.

EXTENSION ACTIVITIES LIFE SCIENCE

You may choose any extension activities as long as you have an A or B in science. Tests are still required. Dates and study guides for tests will be posted on my weebly web site.

Any of these extension activities may be chosen instead of vocabulary assignments or textbook assignments. You may also choose to do any activity in addition to a classroom assignment. If you feel that a classroom activity is redundant with what you have already done for an extension activity, you may plead your case. Then you could pick an extension activity rather than the classroom activity.
