

Science Test Chapter 1 Review

Know how to create a graph including title, labeling each axis, and plotting data accurately. Almost half the points are from graphing.

It is life science, so explain what that means. Remember that the vocabulary words in red with an asterisk are the most important. Check the list in google classroom.

Be able to give examples using metric measurements. Be able to match examples to scientific law and a scientific theory. Be able to list the five characteristics of all living things.
